

Range Rat - Todo List

Core Features & Functionality

Warm-Up Session

- ☒ ~~Add warm-up section to UI~~
 - ☒ ~~Tee time add (Scheduled arrival at range)~~
 - ☒ ~~Change time increment (currently 00-60 mins every 5, change to custom intervals)~~
 - ☒ ~~Allow for custom time entry~~
- ☐ Add "Preferences" section where users set preferred arrival time before round
- ☒ ~~Ensure grace period logic automatically applies to custom times~~
- ☒ ~~Make sure logic handles grace period correctly for custom times~~

Practice Mode

- ☐ **Needs significant fixes:**
 - ☐ Drills and logic need to be controlled and tailored (PRIORITY)
 - ☐ Simplify overall flow
- ☐ Change drills given (Simplify)
- ☐ Need to make it so it only shows what to do.
 - Prompts the drill and the amount of balls. When golfer hits next it adds them to the total hit, and completes some progress

Range Session

- ☒ ~~Make sure the balls match the total~~
- ☒ ~~Separate "Woods and Driver" into separate table~~
- ☒ ~~Add whole bag section~~
 - ☒ ~~Add logic: when all other items are selected, whole bag automatically turns on~~
- ☒ ~~Add custom ball limit (not preset buckets)~~
- ☐ Change logic for ball tracking
- ☐ Change drills given (Simplify)

Games

- ☒ ~~Closest to the Pin~~
- ☒ ~~Grid Game~~
 - ☐ Add "make it take it" logic
- ☒ ~~Fairway Game~~
 - ☒ ~~Do NOT require fairway to be set manually in app (auto-detect or simplify)~~

What's in the Bag

- ☒ ~~Add fields:~~
 - ☒ ~~Brand/Manufacturer~~
 - ☒ ~~Club Degree~~
 - ☐ Section for benched clubs (clubs not in active bag)
- ☒ ~~Add edit feature (panel to change state)~~
- ☒ ~~Limit clubs to 14 maximum~~
- ☒ ~~Load from sets (don't auto-expand)~~
- ☐ Allow for additional clubs to be tracked
- ☐ Yardages load in from Yardages-time (takes only full Swing yard)
- ☒ ~~**Pre-requisite:** What's in the bag must be inputted BEFORE entering yardages~~
 - ☐ Add direct button to navigate to bag setup

Club Yardage Tab

- ☒ ~~Add "My Yardages" tab in profile (Pro feature)~~
- ☒ ~~Could be separate thing like other options~~
- ☒ ~~Table structure:~~

Club	1/2 Swing	3/4 Swing	Full Swing
SW			
GW			
LW			
PW

Combine Feature (Pro)

- ☒ Tool that grades user on shot shaping and gives final score at end
- ☒ Store results in profile memory
- ☒ Allows for consistent measurement and comparison
- ☒ User clicks yes/no after each shot

Profile & Settings

- ☐ Add Profile Setting section (Free and Pro tiers)
 - ☒ Auto load player one as player's first name if profile is created
 - ☐ Display player state
 - ☒ Track all time stats of sessions

Authentication & Onboarding

Log In System

- ☒ Add log in feature
- ☐ Free and Pro log in options
- ☒ Add ability to upgrade from Free to Pro

- ☒ ~~Add feature where creating an account matches all-time stats~~

Onboarding

- ☒ ~~Change template name from default to "First Name Last Name" format~~

Monetization

Payment/Paywall

- ☐ Run audit: verify paywall feature is set up so it can easily switch when Stripe integrated
- ☒ Stripe integration
 - ☒ Add pay wall
 - ☒ ~~Subscription OR one-time purchase options~~

UI/Design

Landing Page

- ☒ ~~Make UI look better~~
- ☐ Add logos
- ☐ Add animation of logos
- ☐ Need to add a toggle for light and dark modes

Logo Integration

- ☒ ~~Ensure correct PNG loads in~~
- ☒ ~~Create white logo for dark mode~~
- ☐ Create loading screen animation: mascot hitting golf ball into app
- ☒ ~~Ensure correct script logo is in app~~
- ☐ Create outline of rat as background stencil

General UI Fixes

- ☒ ~~Make sure all text reads properly~~
- ☒ ~~Things should NOT generate automatically~~
- ☒ ~~No AI slop/auto-generated content~~

Can build now (relatively quick wins):

- Handicap field in onboarding -- free to enter/display, pro to see the progress graph
- Post-round journal prompt -- if a tee time is set in Round Warm Up, send a push/email 5 hours later asking how the round went
- Expanding combines -- putting and chipping versions using the same framework as Range Rat Combine
- Professional email forwarding (e.g. hello@rangerrat.app → your Gmail)

Medium-term (need more backend/design work):

- Round stat entry + AI tips based on weaknesses (missing greens short-left → work on distance control)
- Handicap progress line graph (pro feature)
- Creator profiles -- pros/influencers publishing their own practice plans
- On-course stat tracking / GHIN-style round logging
- Push notification reminders for handicap updates

Long-term / business:

- Training aid marketplace + affiliate revenue
- Launch monitor integration (Garmin, Rapsodo, etc.)
- Group score syncing for on-course games
- Gorilla marketing + faceless TikTok content
- Range Rat branded training aids
